

SOLUTIONS FOR THE HORSE

I, Charles Hatchett a democrat for the first district race for U.S. House of Representatives Kentucky propose that western Kentucky be the sanctuary for unwanted horses and the American Mustang. We have groceries for this project by utilizing C.R.P. and already rented by the government. Horses in the west need 12 to 20 acres for pasture. We can pasture a horse on 1-1/2 acre to 2 acres. Our district will have to be compensated for taking the horse problem away from the western states. Jobs would be created, fencing, barn restoration, vet services, dozer work, water projects from well to ponds, and many more jobs including marketing.

These horses will be marketed from the Signature State Kentucky and also the world notoriety of having the Equestrian World Games and the Kentucky Derby. Horses will be offered for adoption, 4-H projects, pack animals, workhorses, and riding horses to countries whom need them. We can be the greatest market place because of the transportation by water.

In Genesis the God of creation tells man to take dominion over the animals. Our Congressman Ed Whitfield proposed the legislation that destroyed the horse market. Now we can solve this problem by expanding the opportunities for the use of horses.

These horses are not going to heaven but they are for sure in paradise when they get to Kentucky.

Sincerely

Charles Hatchett

Take a Hatchett to Congress

We will run the district with a congressional council in the ~~X~~ District.

Decisions made by the people in the district. You can have a say in what happens to you.
