

RE: GIVE FREEDOM TO GET FREEDOM

Whitehouse
1600 Pennsylvania Avenue N.W.
Washington, DC 20500

Dear Mr. President,

I am a citizen of the United States of America pledging to pray for you and our nation. I believe that God is still on the throne and he has placed you here in this time to lead our country and change the world. I would like for you to propose amendments to our trade agreements that our nation not participate in trade where slave or poverty wages are the practice of that country. I hope in the near future there will be only two labels on products sold in the USA. One Made in the USA and the other USA Approved Import where the wages paid making that product equal to the USA minimum wage. Please let us lift the world to our standard not the USA to poverty.

Mr. President, your legacy can be that you helped end some of the world's poverty and slavery. The United States can be the land of the free and the advocate of paying a living wage world wide.

God bless you Mr. President and God bless the USA. To God be the glory and to His Son Jesus Christ who taught us to do unto others as you would have them do unto you. Our country must follow that teaching giving freedom to get freedom.

Yours truly,

P.S. We support clean energy and enclosed is a Hydrogen Electric Plant proposal. We support Charles Hatchett for Hydrogen Energy in Western KY.

Enel Opens World's First Hydrogen-Driven Power Plant

Italian company Enel SpA made **renewable energy** history this week when it opened the world's first **hydrogen**-driven power plant to produce a significant amount of electricity in Fusina, Italy. The plant, located just outside Venice, will produce 16 megawatts of power, or enough energy for 20,000 homes. Enel's power plant will also save 17,000 tons of CO2 emissions compared to a coal plant.
